Microcredential Program

In the grand e-launch of the Project Management, CyberSecurity, and Design for Manufacture and Assembly Academies, the Center for Continuing Education and Special Competencies (CCESC) introduced the Microcredential Program. The Microcredential Program provides equivalent MS degree course units for short courses taken at Mapúa CCESC. Most of the short training courses offered in the Academies have equivalent MS degree course units for programs like IT, Industrial Engineering, Engineering Management, Electrical Engineering, Electronics Engineering, Mechanical Engineering, and Construction Engineering Management. Should the trainees decide to pursue master's degree studies, the equivalent units are valid for two (2) years from the date of completion of the short courses. CCESC will be offering more short courses with equivalent MS degree units soon.

Asynchronous Courses

Mapúa CCESC has revolutionized its training programs in response to the New Normal. From converting all of its face-to-face trainings to synchronous online programs last year, this year, Mapúa CCESC will be offering training programs in asynchronous online mode.

Asynchronous learning is a form of education, instruction, and learning that integrates micro-video lectures, educational materials, activities, and assessments that may be accessed by learners at their own time and pace. Cisco-related training courses for BS Electrical Engineering and Computer Engineering programs in this mode of delivery shall be completed soon for implementation.

Mapúa University 96th Foundation Week Celebration

In celebration of the 96th Foundation Week of Mapúa University, Mapúa CCESC held the e-launching of its Design for Manufacture and Assembly Academy. A free webinar entitled "BIM as Pre-requisite to DfMA: Common Data Environment for your Construction Projects" was conducted via zoom and FB live.

During The Cardinal Excellence Awards, TOEIC perfect scorers and the team that represented the Philippines in Huawei ICT Competition 2019-2020 Global Final and placed 3rd in the Cloud Track were honored.

Mapúa CCESC organizes the TOEIC certification exams every quarter. Huawei Storage public classes for Mapúa students and alumni are also offered at least quarterly since 2019.
